

Naples Park Infrastructure Improvements

March 14, 2019

Dear Residents/Business Owners of 95th Avenue North:

As you may have noticed, construction activities have begun on 95th Avenue North associated with Naples Park Infrastructure Improvements Project. The water main along 95th Avenue was replaced between Vanderbilt Drive and US41 in late 2018, after which the stormwater and wastewater improvements within the 500 block of 95th Avenue were constructed. The major construction within the 500 block is nearly complete and construction will now progress to the 600 block. Beginning on March 18, 2019, construction crews will begin on the remainder of the water, stormwater, and wastewater improvements within the 600 block of 95th Avenue North. Construction of the remainder of the water, stormwater, and wastewater improvements within the 600 block will be complete in 3-4 months.

IMPORTANT REMINDERS:

- Local traffic access will be maintained at all times.
- During construction, notifications for planned water service outages will be sent to the affected residents; however, you may experience intermittent service outages due to field conditions and water main breaks.
- Construction will occur 7 a.m. to 7 p.m. Monday through Saturday.
- Our contractor has filmed a preconstruction video. This video will be used to ensure the contractor returns your property to pre-project conditions and in accordance with the final design plans.
- Survey and marking of the water, stormwater, and wastewater improvements will be performed. Survey stakes and offset marks will indicate the location of the improvements.
- The wastewater main will be installed in the roadway. For safety reasons, the contractor will close the road to through traffic during the work day while the wastewater main is being constructed. Local traffic access will be maintained. The road will be reopened to all traffic at the end of each day.
- Due to the contractor's means and methods of construction and to assure the safety of all, the contractor will need full access of the ROW.
- In accordance with Collier County Ordinance 2009-19 and the ROW Handbook:
 - Everything in the ROW (driveway sections, grass, trees, shrubs, landscaping, ornamentation, structures, mailboxes and irrigation systems) is subject to removal during construction.
 - Regardless of any existing ROW permits, the contractor has the right to remove trees, shrubs, landscaping, ornamentation, and structures that have been installed in the ROW in order to complete the project.
 - Existing trees, shrubs, landscaping, ornamentation, and structures within the ROW will not be replaced.
- Electrical wires installed in the ROW by the residents will need to be de-energized by the owner for the safety of residents and workers.
- Existing irrigation systems in the ROW will be restored to ensure the establishment of new sod. Driveways, grassed areas and mailboxes will also be restored as close to existing as possible. Irrigation electrical components including actuator valves within the ROW will not be replaced by the Contractor, it is the property owners' responsibility to relocate these items to private property before construction begins.

Naples Park Infrastructure Improvements

WHAT YOU CAN DO TO HELP

- Watch for additional door hangers and other notifications of pending construction in your area.
- Mark your irrigation system in the ROW; ROW is generally 30' from the center of the road. This will be recorded by the contractor and will enable your system to be restored as close as possible to pre-construction condition.
- Please contact our hot line at **239-269-1890** or email us at NaplesParkPUR@Stantec.com with any special concerns or access needs; our website will also provide updates and general information pertaining to the project as it progresses. <http://www.collierpur.com>
- We respectfully request that all residents please stay out of the work zones during construction. These areas are designated hard hat and safety vest areas and can be hazardous. This request is not only for your safety, but also for the safety of the contractor and County employees.
- Be patient during construction and subsequent restoration. Your driveway and grassed area will be restored to their preconstruction condition as best as possible.
- Restoration will be ongoing during construction. Temporary surfacing will be used at driveways, with permanent repairs made after the old piping system is removed and the new piping is installed and tested. Similarly, grassed surfaces will be restored at the end of construction. During construction, mailboxes will be temporarily removed, but will be temporarily reinstalled daily. At the completion of all work, all streets will receive an asphalt overlay.

Cordially,

Collier County
Engineering and Project Management Division and Stormwater Section
